Многоканальные резервуары для реагентов

Toss the insert and keep the base, saves you money and saves you space!

Reagent reservoirs are used by many laboratories for the temporary storage of reagent during pipetting applications. However many reservoirs have flimsy troughs, graduations that are hard to read or require a lot of storage space due to bulky packaging.

INTEGRA developed an innovative reservoir solution that features reusable reservoir bases:

- SureFlo™ anti-sealing array prevents pipette tip seal off which can cause liquid to pop into the tip, filter or even the pipette itself
- Unique surface treatment spreads liquid evenly offering even lower dead volumes
- Reuse the sturdy base and toss the disposable insert
- Nest inside each other, making it possible to get twice as many reservoirs in half the space of other products on the market
- Reducing inventory space requirements and shipping costs
- Reusable base with bold, crisp, clearly visible graduation markings

- Available as crystal clear polystyrene reservoirs or polypropylene reservoirs for improved chemical compatibility
- The unique design leads to more accurate reagent measurements, no over pouring, and less waste

How it works

INTEGRA reagent reservoirs offer a convenient solution for the temporary storage of non-solvent based liquids during any pipetting application. The system consists of disposable inserts that fit into reusable bases with clearly visible volume markings. Inserts are available as crystal clear polystyrene reservoirs or polypropylene reservoirs for improved chemical compatibility.

Clear Graduations

Patented design refracts light so graduations below fluid become invisible, making it easier to identify the exact desired volume line.

Reusable Reservoir Base

Holds disposable reservoir securely during use. One free base is included with every case of bulk or individually wrapped reservoirs.

Pour Back Spouts

Molded into each reagent reservoir, convenient pour back spouts control liquid flow and allow you to neatly and easily return excess fluid to a source container, if your protocol allows.

Deep Trough Design

For maximum fluid recovery and minimal waste, INTEGRA reagent reservoirs feature a full length, extra deep trough that is more easily accessible for pipet tips.
